Politecnico di Torino

CET Partnership call module 1

Energy Center Politecnico di Torino, ITALY

Tobias Rieper – Research Assistant

24/06/2025

Politecnico di Torino

People: 1,200 Faculty member 1,000 Administrative staff >35,000 enrolled students (BSc & MSc) >1,000 PhD students

https://www.polito.it/

Energy Center

- Center for applied energy research, linked to Energy Department
- 80% private companies and 20% academic research groups
 - \rightarrow interface between research and industry
- Lab for hardware testing and simulation

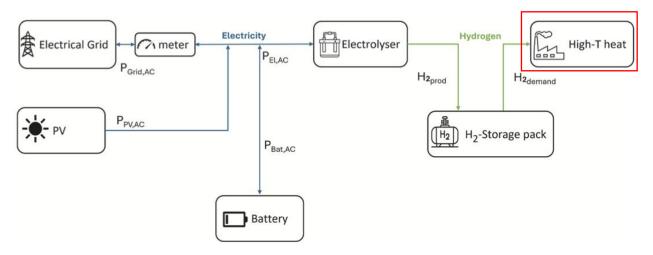

https://www.energycenter.polito.it/

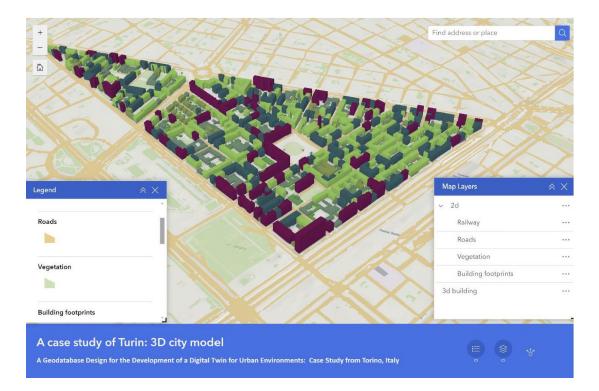

Our Capability Portfolio

- Multi energy (e-, heat, H₂) co-simulations, considering industrial consumers
- 3-D geospatial models of positive energy districts
- Long-duration storage test-bench
- AI / ML analytics, e.g. for battery analyses

Optimisation of green hydrogen production for hard-to-abate industries: An Italian case study considering national incentives (Stolte et al. 2024)

Open Project Directions (examples)

Potential R&D topics:

- 1) Development of web-based multi-vector simulation tool
- 2) Hardware-in-the-loop (HIL) sandbox: storage and ancillary service control
- 3) Multi-vector storage integration study for industrial sites
- 4) Flexibility KPI estimation for industrial sites, considering regulatory frameworks

\rightarrow All concepts are starting points – ready to co-design with partners

What We Offer & Seek

We offer:

- ✓ Modelling & data-analytics team
- \checkmark Lab infrastructure & city data
- \checkmark EU project coordination experience

We seek:

- → Industrial need-owner (MUST)
- → Industrial system integrator (MUST)
- → Academic partners with existing links to industrial stakeholders (PLUS)
- → Storage or process OEM (PLUS)
- → Public authority for scalability/replication (PLUS)
